Dear Bob,

I talked to Walt the other night and neither of us could remember anything else regarding the incident other than what we discussed.

The excerpt from the wing history raised more questions that might be answered by the Report of Investigation. Specifically pages 6, 7, & 8 which cover the interviews with Walt and me. This interview was taped and there should be a transcript somewhere, maybe as an appendix to the report. Page 27 also might prove interesting with regard to the UFO's.

Sorry I couldn't be of more help. Should you get a copy of the Report of Engineering Investigation that might help the memory.

I am curious about how this all came up again after almost thirty years. Would appreciate your enlightening me in this regard. Also am wondering how in the world you located me as I have some old friends I would like to find again.

Sincerely,
